SUMMARY

AI Product Manager and full-stack builder with a track record of shipping 7+ enterprise products end-to-end at Heritage Foods Ltd (INR 3,500+ Cr FMCG). Owns the complete product lifecycle including requirement definition, technical architecture, cross-functional stakeholder alignment, and production delivery. Deep expertise in AI systems including multi-agent pipelines, LLMs, and RAG, as well as data science covering machine learning, forecasting, and geospatial modelling. Strong background in agile product management, sprint planning, and roadmap planning. MBA from IIM Nagpur. Regularly presents product strategy and business impact to CEO, COO, CIO, and Executive Director.

WORK EXPERIENCE

Manager, Analytics and AI

June 2025 - Present

Heritage Foods Limited | Hyderabad, India

- **PO Automation Engine:** Architected a 5-agent AI pipeline covering email ingestion, PO validation, order creation, delivery scheduling, and GRN verification. Served 50-60 MRF enterprise chains including Zepto, Blinkit, Reliance, and D-Mart across 400+ delivery centers, slashing processing time from days to minutes and eliminating manual entry errors.
- **Purity Ka Report Card:** Conceived and delivered a consumer-facing milk quality transparency platform end-to-end, including a QA batch portal, public batch code lookup site with PDF download, and QR code integration on packaging. Scaled to thousands of monthly lookups, driving measurable consumer trust signals tracked by the brand team.
- **Vendor Onboarding Portal:** Designed and launched a 7-step digital approval workflow integrating PAN, Aadhaar, MSME, and GST APIs, compressing vendor onboarding from 4-6 weeks to under 48 hours across 200+ annual vendor onboards.
- **Retail Survey and Mapping Platform:** Scoped, built, and shipped a full retail census tool in under 1 month to support Heritage's DMS rollout across 6 states. Covered 1,80,000+ stores with 300 Sales Executive logins, geofencing, S3 image capture, competitor mapping, and volume potential scoring at 5-10 min per store.
- **Assetify:** Launched a national asset management platform tracking 5,000+ assets with end-to-end approval workflows, reducing asset request turnaround by 30%.
- **Compliance Training Portal:** Developed and deployed an LLM-powered training platform featuring AI-generated quizzes, auto-summaries, and a bite-sized content UI. Achieved 65% course completion and 80% voluntary certificate sharing.
- **Heritage Samarth and Prism:** Designed and delivered two enterprise analytics platforms. Samarth tracks real-time sales KPIs, SE performance, and region drill-downs with role-based access from Branch Manager to CEO, governing INR 6.6 Cr in daily revenue. Prism applies RFM segmentation across 150+ collection centers, processing 10+ Crore farmer-level rows to surface churn risk.
- **Geospatial Territory Redesign:** Applied KNN and DBSCAN clustering across 900+ field agents in 6 states to identify under-penetrated retail clusters, placed new distributors, and unlocked 16,000 litres per day in incremental milk sales. Presented data-backed analysis to regional leadership to drive adoption.
- **Demand Forecasting:** Developed a Holt-Winters forecasting model on 36 months of historical data for evidence-based budget planning. Curd SKU model achieved 90%+ forecast accuracy.
- **AI and Automation Suite:** Engineered an AI invoice parser converting unstructured PO and non-PO formats into SAP-compatible outputs at 95% accuracy, saving Finance 40+ hours per month. Integrated SAP S/4HANA with Anaplan via OData APIs, eliminating a third-party vendor. Deployed a multi-bank reconciliation portal recovering 15+ hours per month for Finance.

Management Intern, Analytics

April 2024 - May 2024

Heritage Foods Limited | Hyderabad, India

- Earned Pre-Placement Offer by architecting a real-time cross-sell recommendation engine using Market Basket Analysis, directly influencing product bundling strategy for the Sales team.

Software Developer, Full Stack

July 2022 - June 2023

Polestar Solutions and Services | Noida, India

- Directed a 5-member team in building and releasing 3 production web applications using Python, Django, and React.js for enterprise clients, managing end-to-end delivery across requirements, development, and QA cycles.
- Delivered product demos to clients at key project milestones, translating technical capabilities into business value and incorporating client feedback into sprint cycles.
- Strengthened application security and performance across all deployed products, reducing average page load time by 35% and achieving zero critical vulnerabilities in quarterly audits.

EDUCATION

Master of Business Administration (MBA)

2023 - 2025

Indian Institute of Management (IIM), Nagpur

President, Toastmasters Club. Led 35+ member team across 15+ events, raised member satisfaction by 20%, reduced event cancellations by 18%.

B.Tech, Computer Science and Engineering

2018 - 2022

G.B. Pant Govt. Engineering College, Delhi

Executive Member, Web Team. Led full-stack development of the college website and implemented security protocols.

SKILLS

AI and Product Management: LLMs, Multi-Agent Systems, RAG, LangChain, Agentic Automation, Zero-to-One Product Development, Product Roadmap, User Stories, PRDs, OKRs, Agile, Scrum, Sprint Planning, Stakeholder Management, Cross-Functional Collaboration, A/B Testing, Funnel Analysis, KPI Design

Data and Analytics: SQL, Python, Pandas, Scikit-learn, Machine Learning, NLP, Holt-Winters Forecasting, RFM Segmentation, Market Basket Analysis, Geospatial Modelling, KNN, DBSCAN, Data Pipeline, Business Intelligence

Engineering and Platforms: Flask, Django, React.js, REST API, AWS S3, AWS EC2, SAP S/4HANA, Anaplan, Power BI, Tableau, Git, Jira

Strategy: Go-to-Market Strategy, Market Intelligence, Competitive Research, Product Analytics, Roadmap Planning, Process Improvement, Requirements Gathering, Product Discovery
